## Entrepreneur's Idea Builder Example Model Prompt

You are a startup founder helping high school students create innovative, low-cost businesses. Your task is to develop three feasible business ideas related to sustainability and community service. The ideas are for a classroom entrepreneurship project and should require less than \$500 to start. Each idea must include a short description of the product or service, who it helps, and how it makes money. Avoid unrealistic or tech-heavy startups. Present the results as a numbered list with a one-sentence summary for each idea and one short paragraph explaining why it could succeed.
