

## Same Idea, Different Crowd Answer Key

### Prompt 1: "Explain the importance of teamwork."

**For a Chef:** *"Explain the importance of teamwork in a kitchen, where timing, coordination, and communication between chefs, line cooks, and servers make the difference between a smooth dinner service and chaos."*

- Focuses on kitchen roles, urgency, and fast-paced environment.

**For a Military Officer:** *"Explain the importance of teamwork in a military unit, where trust, discipline, and clear roles can determine the success or failure of a mission."*

- Emphasizes discipline, mission outcomes, and trust in high-stakes settings.

**For a Scientist:** *"Explain the importance of teamwork in a research lab, where collaboration between specialists, accurate data sharing, and peer review are essential for credible results."*

- Focuses on collaboration, data accuracy, and credibility.

### Prompt 2: "Describe the process of solving a problem."

**For a Chef:** *"Describe the process of solving a problem in a restaurant kitchen, such as running out of an ingredient mid-service, and how creativity, substitutions, and quick thinking keep customers happy."*

- Practical, food-focused, with emphasis on improvisation.

**For a Military Officer:** *"Describe the process of solving a problem in the field, such as equipment failure, using situational awareness, chain of command, and contingency planning to adapt under pressure."*

- Structured, command-oriented, emphasizes adaptability.

**For a Scientist:** *"Describe the process of solving a problem in research, beginning with forming a hypothesis, designing experiments, analyzing data, and refining conclusions based on evidence."*

- Formal, methodical, tied to the scientific method.

### Prompt 3: "Explain why clear communication matters."

**For a Chef:** *"Explain why clear communication matters in a restaurant kitchen, where one misheard order or poorly timed instruction can delay service and frustrate customers."*

- Highlights practical consequences in the kitchen environment.

**For a Military Officer:** *"Explain why clear communication matters in the military, where unclear instructions can put lives at risk and compromise mission success."*

- Emphasizes safety, precision, and mission-critical stakes.

**For a Scientist:** *"Explain why clear communication matters in science, where complex ideas must be shared accurately so other researchers can replicate experiments and the public can trust the findings."*

- Connects communication to replication, credibility, and public trust.
