Name _____

Predicting AI Oopsies Before They Happen Answer Key

Weak Prompt 1 - "Tell me about animals."

Possible flawed answer:

AI might give a random list of animals with little depth, or an overly broad description that's too general to be useful.

Stronger Rewrites:

"Explain how mammals and reptiles are different, including examples of each."

"Describe three amazing survival adaptations animals use in the wild."

"Write a short article about why some animals migrate."

Weak Prompt 2 - "Write a report."

Possible flawed answer:

AI might produce a generic "report" with no clear topic, length, or structure.

Stronger Rewrites:

"Write a one-page report on the causes and effects of climate change."

"Create a report with an introduction, three main points, and a conclusion about renewable energy."

"Write a report for middle school students explaining why recycling matters."

Weak Prompt 3 - "Explain history."

Possible flawed answer:

AI could return an impossibly broad timeline from the Stone Age to now-or skip to random highlights without context.

Stronger Rewrites:

"Explain the main causes of the American Civil War in two paragraphs."

Summarize the events of World War II in a timeline format."

"Describe three inventions that changed history during the Industrial Revolution."
