## ① Intent Inference

**Directions:** Read each email carefully. Look for **clues** about what the sender really wants or feels, even if it isn't directly said. Write down what you can infer about the sender's intent. Specify which words or details helped you make your inference.

### Email 1:

Hi Jordan,

I hope you're doing well. I noticed you haven't turned in your group project notes yet, and we're supposed to finalize everything by Friday. It would really help if I could have your portion by tomorrow so I can combine it with the others. I know you've been busy, but without your notes, the group won't be able to complete the assignment on time. Thanks in advance for sending them soon.

Best,

Maya

### Email 2:

Dear Valued Customer,

We wanted to let you know about our limited-time sale on laptops, which ends this Sunday. Many models are discounted by up to 25%, and some come with free accessories while supplies last. We encourage you to act quickly before the offer expires. This is a great chance to upgrade your technology at an affordable price. Don't miss out!

Sincerely,

TechDirect Team
