Teacher's Guide

- This worksheet strengthens **procedural reading, sequencing, and cause and effect thinking**.
- For support, have students underline the transition words like **first, next, and then** before choosing an answer.
- For engagement, allow students to act out one of the procedures after completing the quiz.
- For extension, ask students to write their own four-step procedure and create a **next-step question** for a partner.
- For advanced learners, challenge students to explain why each wrong choice does not make sense.
