1. 11 dollars
2. 11 dollars
3. 12 dollars
4. 9 dollars
5. 14 dollars
6. 16 dollars
7. 21 dollars

Teacher's Guide

- This worksheet builds **menu reading accuracy**, **addition fluency**, and **multi step problem solving**.
- For differentiation, allow students to highlight each item price before adding.
- For engagement, let students role play as cashiers and customers while checking totals aloud.
- For extension, have students write one new order using at least four items and challenge a partner to solve it.
