## Step Cleanup

**Directions:** Read each confusing recipe step. Rewrite it so it is **clear, precise, and easy to follow**.

### Original Recipe: One Pan Veggie Pasta

The recipe works, but several steps are written in a confusing way. Your job is to rewrite each step so another student could follow it without guessing.

1. Confusing Step: Put the vegetables in when it feels right and cook them until they look done.

---

---

2. Confusing Step: Add the pasta stuff with some water and let it go for a while.

---

3. Confusing Step: Stir everything sometimes so it does not mess up.

---

4. Confusing Step: Put the cheese on near the end but not too early.

---

5. Confusing Step: Stop cooking when it seems finished and serve it carefully.

---

---

**Reflection Question:** Why is **clear wording** especially important in recipes?

---
