Teacher's Guide

- Use this worksheet to strengthen **sequencing**, **comprehension**, and **procedural reading** skills for Grades 2 to 3.
- Have students explain why their step belongs in that exact spot to reinforce logical order.
- For differentiation, provide sentence starters for emerging readers and challenge advanced students to rewrite the entire recipe in their own words.
- Increase engagement by letting students draw a picture of the missing step after writing it.
- As an extension, ask students to create a new short recipe with one step missing for a partner to solve.
