# Grade 10 ChatGPT Activity - Designing the Future

Objective: Work with ChatGPT to imagine a future invention or major change in society. You'll explore how it might help people, what challenges it could cause, and what ethical questions it raises.

Step 1 Imagine the Innovation - Think of a possible invention or technology that could exist 50-100 years from now. It can be realistic or imaginative - just something that changes daily life.

Examples: A computer that can read thoughts • A medicine that stops aging • Flying cities • AI-powered teachers • A machine that controls the weather

My Innovation: _____

Describe what it does:

_____

_____

_____

_____

Step 2 Ask ChatGPT to Describe It - Ask ChatGPT:

"Hi ChatGPT, I've invented [describe your idea briefly]. What do you think this technology could do, and how might it change people's lives?"

Summarize ChatGPT's answer below:

_____

_____

_____

_____

Step 3 Explore the Benefits - Ask ChatGPT:

"What are three positive ways this invention could help people or society?"

List the three benefits ChatGPT mentions:

1. _____

2. _____

3. _____

GetWorksheets.com

Name _____

Step 4 Explore the Risks - Ask ChatGPT:

"What are three possible risks or problems this invention could create?"

List the three risks ChatGPT mentions:

1. _____

2. _____

3. _____

Step 5 Ask About the Ethical Questions - Ask ChatGPT:

"What ethical questions or moral problems might people debate about this invention?"

Write down ChatGPT's ideas:

_____

_____

_____

_____

Step 6 Ask About Real-World Connections - Ask ChatGPT:

"Are there any real technologies today that are similar to this idea? How are people already trying to make this happen?"

Write what you learn:

_____

_____

_____

_____
