

Name _____

Creative Writing: Purely Renewable World

Imagine a world where most of the energy comes from renewable sources like the **sun, wind, water, geothermal heat, and biomass**. In this activity, you will use your creativity to describe what life in the future might look like if renewables power homes, schools, cars, and entire cities.

Writing Prompts: Choose one (or more) of the prompts below and write a **short paragraph (5-7 sentences)**.

1. **City of the Future:** Describe a futuristic city where everything runs on solar panels, wind turbines, and hydropower. What does it look like? How do people live?
2. **Everyday Life:** Imagine your daily routine 50 years from now in a renewable-powered world. How would your school, home, or transportation be different?
3. **Earth's Recovery:** Write about how the environment has changed now that people mostly use renewable energy. What do the skies, rivers, and forests look like?
4. **Energy Heroes:** Pretend you are a scientist or inventor who helped society switch to renewable energy. Write about what you created and how it changed the world.

Reflection Question: Why do you think renewable energy is important for the future of people and the planet?
