

## Creative Writing: Purely Renewable World Answer Key

### (Sample Responses)

Because this is a **creative writing task**, answers will vary. Strong responses should include:

1. **City of the Future (sample):** "The city shines with rows of solar panels on every roof, and tall wind turbines spin near the coast. Cars run quietly on clean electricity, and the air feels fresh. People enjoy parks filled with green trees because the skies are no longer polluted."
2. **Everyday Life (sample):** "I wake up in a home powered by solar energy, and the lights turn on without using fossil fuels. My school's computers run on clean wind power. We ride on buses that use renewable energy, so there is no smoke in the air."
3. **Earth's Recovery (sample):** "The rivers sparkle again, and fish have returned in large numbers. The skies are bright blue without smog. Forests grow healthier, and animals roam freely in cleaner habitats."
4. **Energy Heroes (sample):** "I invented a special turbine that collects energy from both wind and sunlight. My invention powers entire cities. People call me a hero because I helped reduce pollution and gave the planet a fresh start."

**Reflection (sample answer):** Renewable energy is important because it never runs out, helps keep Earth clean, and provides safe power for future generations.
