

Name _____

Rounding Check Answer Key

1. True
2. True
3. False, 3,000
4. True
5. False, 8,200
6. True
7. False, 500
8. True
9. True
10. False, 5,000
11. True
12. True

Teacher's Guide

- Review the rounding rule before students begin and encourage them to check the digit to the right of the rounding place.
- Have students explain why each false statement is incorrect before writing the corrected answer.
- Pair students to compare answers and discuss any disagreements using place value language.
- Encourage students to create one true and one false rounding statement for a partner to solve.
- Provide a place value chart or number line for students who need additional support.
- Extend the activity by asking students to rewrite each false statement so it becomes true without changing the original number.
