

Name _____

Rounding Errors Answer Key

1. 490
2. 2,700
3. 8,000
4. 910
5. 8,300
6. 16,000
7. 70,000
8. 3,800
9. 5,950
10. 41,000
11. 10,000
12. 700

Teacher's Guide

- Explain that every problem contains an incorrect rounding statement, even if the error is small.
- Encourage students to identify the rounding place and check the digit to its right before correcting the answer.
- Provide a place value chart or number line for students who need additional support.
- Have students explain what mistake was made in each problem, such as rounding up instead of down.
- Let partners compare corrections and justify their reasoning using place value vocabulary.
- Extend the activity by asking students to create three incorrect rounding statements for classmates to solve.
