

Name _____

Rounding Table Answer Key

Rounded Number

1 58,500

2 165,000

3 740,000

4 500,000

5 82,150

6 296,000

7 620,000

8 900,000

9 125,800

10 480,000

11 860,000

12 500,000

Teacher's Guide

- Review the meaning of each place value before students begin the table.
- Encourage students to identify the rounding place and the digit to its right before writing each answer.
- Allow students who need support to use a place value chart while completing the table.
- Have partners compare answers and explain why each number rounded up or down.
- Turn the activity into a timed challenge after students are familiar with the rounding process.
- Extend learning by asking students to create four new rows for the table using their own multi-digit numbers and different place values.
