

Name _____

Rounding Checker Answer Key

1. True
2. True
3. True
4. True
5. True
6. True
7. True
8. True
9. False. Correct answer: 520,000
10. True
11. True
12. False. Correct answer: 56,950

Teacher's Guide

- Encourage students to round each original number before deciding whether the statement is true or false.
- Remind students to check the digit immediately to the right of the rounding place.
- Have students explain why false statements are incorrect and describe the correct rounding process.
- Pair students to compare answers and discuss any disagreements before reviewing the key.
- Provide a place value chart for students who need additional support with identifying the rounding place.
- Extend the activity by having students write two true and two false rounding statements for a partner to solve.
