

Name _____

Rounded Place Values Answer Key

1. 83,000
2. 500,000
3. 147,400
4. 970,000
5. 75,590
6. 232,000
7. 700,000
8. 408,800
9. 360,000
10. 126,450
11. 880,000
12. 500,000

Teacher's Guide

- Review each place value before students begin. Encourage them to identify the target digit first.
- Have students highlight or underline the place value named in each problem before rounding.
- Provide a place value chart or base ten chart for students who need extra support.
- Turn the activity into a partner challenge by having students explain why each answer rounds up or down.
- Ask early finishers to write three new multi-digit numbers and choose different place values for a classmate to round.
- Extend learning by asking students to order the original numbers and compare how rounding changes their values.
