Teacher's Guide

- Quick implementation: Review that students should look at the tens digit when rounding a number to the nearest hundred.
- Differentiation: Have students first label each number as closer to 300, 400, or 500 before sorting.
- Engagement: Turn the three benchmarks into "number neighborhoods" and challenge students to place every number in its correct neighborhood.
- Extension: Ask students to create two additional numbers for each benchmark group and explain why each belongs there.
