## Place Value Mystery Answer Key

1. Ten
2. Hundred
3. Hundred
4. Thousand
5. Ten
6. Thousand
7. Hundred
8. Ten-thousand
9. Ten
10. Thousand

### Teacher's Guide

- Quick implementation: Remind students that the zeros and unchanged digits in the rounded value can provide clues about the place used.
- Differentiation: Let students underline the digits that changed between the original and rounded numbers.
- Differentiation: Challenge students to verify each answer by rounding the original number themselves.
- Engagement: Present each pair as a mystery and award one point for correctly identifying the hidden rounding place.
- Extension: Have students create three original-and-rounded number pairs for a partner to identify.
