

Name _____

Rounding Rally Answer Key

- | | |
|--------|------------|
| 1. 30 | 7. 1,300 |
| 2. 70 | 8. 3,700 |
| 3. 130 | 9. 2,000 |
| 4. 480 | 10. 6,000 |
| 5. 400 | 11. 12,000 |
| 6. 700 | 12. 28,000 |

Teacher's Guide

- Quick implementation: Review the rounding rule before students begin. Have students identify the rounding digit and then check the digit immediately to its right.
- Differentiation: For extra support, let students underline the rounding digit and circle the digit to its right before answering.
- Differentiation: For an added challenge, ask students to complete the worksheet without grouping the problems by place value.
- Engagement: Turn the activity into a quick "rounding rally" by having students complete one section at a time and check their accuracy before moving on.
- Extension: Have students choose three answers and write the two consecutive multiples of 10, 100, or 1,000 that the original number falls between.
