

Name _____

Estimate Express Answer Key

1. $50 + 80 = 130$
2. $130 + 270 = 400$
3. $360 - 140 = 220$
4. $700 - 300 = 400$
5. $1,200 + 2,700 = 3,900$
6. $3,700 - 1,400 = 2,300$
7. $5,000 + 4,000 = 9,000$
8. $13,000 - 7,000 = 6,000$

Teacher's Guide

- Quick implementation: Remind students to round each number separately before performing the addition or subtraction.
- Differentiation: Have students underline the digit in the specified rounding place before solving.
- Differentiation: For extra support, let students write each rounded number directly beneath the original number.
- Engagement: Have students predict whether each estimate will be greater or less than the exact answer before checking.
- Extension: Ask students to find the exact answer for four problems and compare it with the estimate.
