Teacher's Guide

- Quick implementation: Remind students to look one digit to the right of the place being rounded before choosing a match.
- Differentiation: Have students underline the rounding place and circle the deciding digit before matching.
- Differentiation: Challenge students to complete the matches without writing intermediate rounded values.
- Engagement: Let students solve the number side first, then search the mixed answer bank for each matching value.
- Extension: Ask students to create three new numbers that would round to three values from the answer bank.
