

Name _____

Rounding Chart Answer Key

Rounded A Rounded B Symbol

1	270	290	<
2	600	600	=
3	1,240	1,260	<
4	900	900	=
5	430	430	=
6	2,200	2,100	>
7	720	740	<
8	3,300	3,500	<
9	970	970	=
10	5,500	5,500	=

Teacher's Guide

- Demonstrate one row before students begin the table independently.
- Remind students to round both numbers before comparing them.
- Encourage students to check the specified place value carefully before rounding.
- Provide a place value chart for students who need additional support.
- Have students compare answers with a partner and explain any rows where the rounded values are equal.
- Challenge early finishers to create two new rows for the table and solve them.
- Ask students to identify patterns in the rows where the comparison symbol is "=" and discuss why those results occurred.
