2. 200 and 300, <
3. 90 and 80, >
4. 700 and 700, =
5. 140 and 140, =
6. 600 and 500, >
7. 260 and 260, =
8. 800 and 800, =
9. 710 and 720, <
10. 900 and 1,000, <

Teacher's Guide

- Use one problem as a class example before students begin independently.
- Remind students to round both numbers first, then compare the rounded values.
- Encourage students to underline the place value they are rounding to.
- For support, provide a number line or place value chart.
- For enrichment, have students create two numbers that round to the same value and explain why.
- Ask partners to check each other's rounding before comparing the numbers.
- Challenge early finishers to write three new "Round and Compare" problems for a classmate.
