## Greater Guess Answer Key

1. 64 (60 vs. 70, so 71)
2. 400 vs. 400, Same
3. 190 vs. 180, 187
4. 700 vs. 700, Same
5. 300 vs. 300, Same
6. 800 vs. 900, 878
7. 540 vs. 540, Same
8. 200 vs. 200, Same
9. 920 vs. 920, Same
10. 1,200 vs. 1,300, 1,278

## Teacher's Guide

- Model how to round both numbers before deciding which rounded value is greater.
- Remind students that some pairs will have equal rounded values, so "Same" is a possible answer.
- Encourage students to write the rounded numbers in the margin before choosing.
- Provide a place value chart or number line for students who need extra support.
- Have partners explain why a pair became "Same" after rounding.
- Challenge early finishers to create three pairs of numbers that round to the same ten or hundred.
- Ask students to identify which problems changed the comparison after rounding and explain why.
