Teacher's Guide

- Use this worksheet after introducing S-blends in small groups so students have heard each blend and practiced saying them aloud.
- Encourage students to **say each word slowly**, emphasizing the blend, before writing it in the correct group.
- For students needing support, provide picture cards or act out the word to build meaning and recognition.
- For an extension, ask students to draw their own picture for one S-blend category and label it, or think of additional words that fit each blend.
