Name _____

Raise Check Answer Key

1) $1,200

2) $1,800

3) $2,600

4) $1,120

5) $3,600

6) $2,240

7) $3,240

8) $1,875

9) $4,620

10) $6,300

Teacher's Guide

- Quick implementation: Review how to convert a percent to a decimal, then multiply the annual salary by that decimal to find the raise amount.
- Differentiation: Begin with whole-number percentages before assigning the problems with 0.5% increments.
- Engagement: Have students predict which employee receives the largest dollar raise before completing the calculations.
- Extension: Ask students to add each raise amount to the original salary to determine each employee's new annual salary.
