Name _____

Salary Boost Answer Key

1. $44,100
2. $49,440
3. $57,200
4. $63,550
5. $72,080
6. $76,590
7. $83,600
8. $102,720

Teacher's Guide

- Quick implementation: Review the two steps: multiply the current salary by the raise rate, then add the raise amount to the original salary.
- Differentiation: Have students write the raise amount beside each problem before calculating the new salary.
- Engagement: Ask students to predict which employees will gain more than $3,000 before solving.
- Extension: Have students calculate the new monthly gross pay for two employees using their increased annual salaries.
