Name _____

Payroll Puzzle Answer Key

1. $1,000
2. $57,200
3. $2,800
4. $64,800
5. $1,200
6. $71,500
7. $3,400
8. $87,000

Teacher's Guide

- Quick implementation: Review when to divide and when to multiply. Divide an annual salary to find periodic pay, and multiply periodic pay to find an annual salary.
- Differentiation: Have students label each problem with "multiply" or "divide" before solving.
- Engagement: Challenge students to complete the payroll records without looking back at previously solved items.
- Extension: Have students create two incomplete salary records for a partner to solve, using two different pay frequencies.
