Name _____

Career Pay Match Answer Key

1. E
2. B
3. D
4. H
5. G
6. A
7. F
8. C

Teacher's Guide

- Quick implementation: Review the number of pay periods in one year. Students multiply each periodic amount by the appropriate number of periods, then locate the result in the answer bank.
- Differentiation: Have students write the multiplication equation beside each career before matching.
- Engagement: Let students cross out annual salaries from the answer bank as they make matches.
- Extension: Have students rank the eight careers from lowest to highest annual salary after completing the matches.
