Doctor Prompt: Time for a Checkup! Answer Key

Messy Prompt 1

"Write a story about a young wizard who lives in a magical school. The wizard should be brave and also scared at the same time, but don't make them too scared because they're supposed to be brave. The story should be funny but also serious and dramatic. It should be about 500 words, but also shorter than 300 words so it's quick to read."

Edited Prompt (Sample):

"Write a 400-word story about a young wizard who lives in a magical school. The wizard should be mostly brave but also show moments of fear. Use a lighthearted tone with a touch of drama. End the story with the wizard learning a valuable lesson."

Messy Prompt 2

"Explain how plants grow through photosynthesis, but don't talk about photosynthesis too much, just focus on how plants make their own food. Make it very simple like for a young child, but also use advanced science vocabulary so it looks smart. The explanation should be in one paragraph, but make sure it is at least two or three paragraphs long so it looks complete."

Edited Prompt (Sample):

"Write a two-paragraph explanation of how plants grow through photosynthesis. Keep the language simple enough for a middle school student, but include important scientific terms like 'chlorophyll' and 'carbon dioxide.' Focus on how plants make their own food and produce oxygen."
