## Night Sky Observation Journal

**Directions:** Go outside on a clear night (or use a star map app if the sky is cloudy). Look up at the stars and write down what you see. If you can't go outside, imagine what the sky would look like using what you've learned in class. Fill in the journal prompts below.

1. Date and Time of Observation:

---

2. Weather and Sky Conditions (clear, partly cloudy, etc.):

---

3. Constellations I Observed (name at least two):

---

4. Brightest Star I Noticed:

---

5. Describe a Constellation's Shape (what it looks like to you):

---

6. Myth or Story Connected to One of the Constellations:

---

7. Reflection - How does observing constellations make you feel?

---

---
