

Name _____

Constellation Creation

Directions: Throughout history, people have connected stars into patterns and given them names with special meanings. Now it's your turn! Follow the steps below to invent your own constellation.

Step 1: Connect the Stars

Draw at least **6-10 stars** in the space below. Use lines to connect them into a shape of your choice.

Step 2: Name Your Constellation

What will you call it? Choose a name that matches the shape or story.

Name: _____

Step 3: Write Its Story

Every constellation has a myth or explanation. Write a short story (3-5 sentences) explaining how your constellation came to be in the night sky.

Step 4: Scientific Details

Fill in these details about your constellation:

- Brightest star's name (make one up or borrow from real star names): _____
- Season when it is most visible: _____
- Where in the sky you'd see it (north, south, east, west):
