## Buzzing With Agreement

**Directions:** Read the passage below. Then, answer the questions in **complete sentences**. Be sure that your subject and verb agree correctly in each answer.

The honeybee is one of the most important insects in the world. A colony of bees usually **contains** thousands of worker bees, a queen, and a few drones. The workers **collect** nectar and pollen, which they bring back to the hive. The queen **lays** eggs and ensures the survival of the colony. Without honeybees, many plants and crops **struggle** to grow because pollination does not occur.

**Mini Quiz Questions** - Write your answers in complete sentences.

1. What group of insects (**help / helps**) pollinate many plants?

2. Who (**lay / lays**) eggs in the bee colony?

3. How many worker bees usually (**make / makes**) up a colony?

4. What food sources do worker bees (**collect / collects**)?

5. What (**happen / happens**) to plants when pollination does not occur?
