

Spot And Correct

Directions: Each problem has one mistake. Circle the error, then write the correct solution.

$$1) \frac{3}{4} - \frac{1}{6}$$

$$= \frac{9}{12} - \frac{3}{12}$$

$$= \frac{6}{12}$$

$$= \frac{1}{2}$$

$$2) \frac{5}{8} - \frac{1}{2}$$

$$= \frac{5}{8} - \frac{2}{8}$$

$$= \frac{3}{8}$$

$$3) \frac{2}{3} - \frac{1}{4}$$

$$= \frac{8}{12} - \frac{3}{12}$$

$$= \frac{5}{12}$$

$$4) \frac{5}{6} - \frac{1}{3}$$

$$= \frac{10}{12} - \frac{4}{12}$$

$$= \frac{6}{12}$$

$$= \frac{1}{2}$$

$$5) \frac{3}{5} - \frac{1}{2}$$

$$= \frac{6}{10} - \frac{5}{10}$$

$$= \frac{2}{10}$$

$$= \frac{1}{5}$$

$$6) \frac{7}{10} - \frac{1}{5}$$

$$= \frac{14}{20} - \frac{4}{20}$$

$$= \frac{10}{20}$$

$$= \frac{1}{2}$$

$$7) \frac{4}{9} - \frac{1}{6}$$

$$= \frac{8}{18} - \frac{3}{18}$$

$$= \frac{6}{18}$$

$$= \frac{1}{3}$$

$$8) \frac{11}{12} - \frac{1}{8}$$

$$= \frac{22}{24} - \frac{3}{24}$$

$$= \frac{19}{24}$$

$$= \frac{19}{12}$$
