

Name _____

Everyday Differences Answer Key

1. $\frac{7}{12}$ yard
2. $\frac{7}{12}$ cup
3. $\frac{13}{24}$ mile
4. $\frac{19}{24}$ foot
5. $\frac{7}{15}$ bag
6. $\frac{3}{10}$ meter
7. $\frac{3}{8}$ liter
8. $\frac{1}{2}$ meter

Teacher's Guide

- Review how to find the least common denominator before solving each problem.
- Encourage students to underline the numbers and identify what is being subtracted before calculating.
- Provide fraction strips or visual models for students who need support with equivalent fractions.
- Have students explain their choice of common denominator to a partner before solving.
- Challenge early finishers to write a one-step fraction subtraction word problem using unlike denominators.
- Extend the lesson by asking students to estimate whether each answer should be greater or less than one-half before solving.
