

Name _____

Honeycomb of Ideas

Summaries start with the **main idea** and are supported by **key details**. A **web organizer** helps you see how smaller details connect to the bigger idea. When you shrink those details into a few sentences, you create a strong summary.

Directions: Read the passage below carefully. Fill in the web with the **main idea** and **three supporting details**. Use your web to write a condensed summary.

The Busy Honeybees

Honeybees are important insects that help plants grow. They fly from flower to flower, carrying pollen that lets plants make seeds and fruit. Bees also collect nectar, which they bring back to the hive to make honey. Inside the hive, bees work together: some guard the hive, some care for the young, and others build wax cells for storage. Without bees, many plants and crops would not survive.

MAIN IDEA

Write your summary: _____
