

Name _____

Honeycomb of Ideas Answer Key

Model Web:

- **Main Idea:** Honeybees are important because they help plants and make honey.
 - **Detail 1:** They carry pollen so plants can make seeds and fruit.
 - **Detail 2:** They collect nectar to make honey.
 - **Detail 3:** Bees have jobs in the hive like guarding, caring for young, and building cells.

Model Summary:

Honeybees are important because they pollinate plants, collect nectar to make honey, and work together in the hive with different jobs.

Teacher Notes

- Emphasize that **not every fact** goes into the summary, only the details that support the **main idea**.
- If students pick unimportant details (like “bees fly around”), guide them back to **essential information**.
- Remind students: A summary should read smoothly, not like a list.
- Extension: Challenge students to shrink their summary into **one sentence** using only the main idea and one strongest detail.
