

## Nordic Living Answer Key

1. Sweden is known for bright cities, thick forests, and long winters.
2. Buildings have bold colors so they stand out during snowy winter months.
3. People enjoy warm meals, indoor games, and cozy gatherings.
4. Daylight lasts much longer during summer.
5. Stockholm is built on many islands that are connected by bridges.
6. Forests provide wood and are popular for hiking.
7. Moose and foxes.
8. They enjoy open spaces and learn to respect nature from a young age.

### Teacher's Guide

- Use the passage to introduce the idea of how geography affects daily life and culture.
- Encourage complete sentence responses for writing practice.

### Differentiation Tips

- For advanced students, ask them to identify additional sensory details in the text.
- Allow students who need support to highlight where the answers appear in the passage.

### Engagement Ideas

- Have students draw a Swedish scene that includes forests, snow, or colorful buildings.
- Invite students to compare Sweden's daylight patterns with their own local seasons.
- Let students imagine a day in Stockholm and describe how they would travel around the city.

### Extension Activities

- Students can research one Swedish animal and write a few facts about it.
- Have students write a short paragraph describing how they would adapt to long winter nights or long summer days.
