

Name _____

Swedish Industry Sort Answer Key

Natural Resource Based:

- Forestry
- Iron ore mining
- Fishing
- Pulp and paper production

Innovation-Based:

- Technology
- Auto manufacturing
- Renewable energy development
- Software and digital services

Teacher's Guide

- Review the meaning of natural resource-based and innovation-based industries before students begin.
- Highlight bold terms to reinforce the connection between resources and economic development.
- After sorting, discuss why each industry fits its category.

Differentiation Tips

- Allow advanced learners to add a brief explanation for at least three of their answers.
- Pair emerging learners with a partner to talk through clues.

Engagement Ideas

- Ask students to brainstorm products that come from each industry.
- Have students vote on which industry they think is most important to Sweden and explain why.

Extension Activities

- Assign students to research a Swedish company from either category and write a short summary.
- Have students predict how Sweden's economy might change as innovation-based industries continue to grow.
