## Word Field Explorer Answer Key

- |               |               |
|---------------|---------------|
| 1. Math       | 5. Technology |
| 2. Technology | 6. Science    |
| 3. Science    | 7. Technology |
| 4. Math       | 8. Science    |

### Teacher's Guide

- **Skill Focus:** Students learn to identify **technical terms** and connect them to their **academic fields** using **context clues** from short sentences.
- **Differentiation Tips:**
  - For younger learners, preview each field with examples (e.g., "Science words describe living things or natural forces").
  - For advanced learners, include additional categories such as **engineering, medicine, or geography**.
- **Engagement Ideas:**
  - Turn this into a "Word Detective" challenge: students collect and label new technical words they find in textbooks or class discussions.
  - Create a group race where students sort a pile of mixed technical words into the correct subject fields.
- **Extension Activities:**
  - Ask students to write one new sentence for each field using a different technical term they know.
  - Invite older students to research a career from one field and list five technical terms used in that profession.
