Oracle and AI

ORACLE

Oracle Corporation is a global technology company founded in 1977, best known for its database software and cloud computing services. Over the decades, Oracle has become one of the largest enterprise technology companies in the world, providing tools that help businesses store, manage, and analyze data.

In recent years, Oracle has expanded its work in artificial intelligence. Its **Oracle Cloud Infrastructure (OCI)** includes AI services that allow businesses to build, train, and deploy machine learning models. These tools are often used in industries such as finance, healthcare, and retail to make predictions, detect fraud, or personalize customer experiences.

One of Oracle's major AI products is the **Oracle Autonomous Database**, which uses machine learning to automate tasks like tuning, security, and backups. This reduces the need for human management and helps businesses save time and resources.

Oracle has also invested in responsible AI, working to ensure that its tools are transparent, secure, and trustworthy. By embedding AI into its databases, cloud systems, and enterprise applications, Oracle plays a significant role in bringing artificial intelligence into the everyday operations of companies around the world.

Fill-in-the-Blank Questions

1. Oracle Corporation was founded in _____.

2. Oracle is best known for its _____ software and cloud computing services.

3. Oracle Cloud Infrastructure (OCI) includes AI services that help businesses build, train, and deploy _____ models.
