

Name _____

Dream Formulas Answer Key

Answers will vary. Correct responses should:

- Clearly explain how each pair of ideas can help people reach success or fairness in America.
- Connect the equation to core values like opportunity, equality, innovation, and progress.
- In the student-created equation, the explanation must show a meaningful connection to the American Dream.

Example acceptable ideas:

1. Hard work and education help people open doors to better jobs and futures.
2. Freedom and laws that protect rights allow everyone a fair chance to succeed.
3. New ideas lead to inventions or improvements that can help society grow.
4. People working together with bravery can make positive changes.

Teacher's Guide

- **Warm-Up Activity:** Ask students to define "equation" in math and compare it to how ideas can "add up" in life.
- **Differentiation:**
 - Provide sentence starters for developing writers ("This equation means that...").
 - Encourage advanced students to reference real people or events that match the equation.
- **Engagement Tips:**
 - Invite students to share their original equations and vote on which ones best represent the American Dream today.
 - Use small groups to brainstorm values that contribute to success and fairness.
- **Extension Ideas:**
 - Students design posters illustrating their equation with historical examples.
 - Connect equations to historical documents like the Declaration of Independence or Bill of Rights that support opportunity and equality.
