## Classify Like a Geologist Answer Key

Igneous Rocks	Sedimentary Rocks	Metamorphic Rocks
1, 2, 4, 7	3, 6, 9	5, 8, 10

### Explanations:

- **Igneous** - Formed from cooling magma/lava (1: granite, 2: tuff, 4: obsidian, 7: pumice).
- **Sedimentary** - Formed from compacted sediments (3: coquina, 6: sandstone, 9: conglomerate).
- **Metamorphic** - Changed by heat and pressure (5: gneiss, 8: slate, 10: marble).
