

Name _____

Rock Type Showdown Answer Key

Igneous Rock	Both	Sedimentary Rock
A, I	B, E, H	C, D, F, G, J

Explanations:

- **Igneous** - Formed from cooling magma/lava (A, I).
- **Both** - Can have crystals (B), be found at surface (E), and form underground (H).
- **Sedimentary** - Formed from compacted sediments (D), may contain fossils (C), result from weathering & erosion (F), often layered (G), and made of rock/mineral/organic fragments (J).
