

Name _____

Solar Energy & Fusion Answer Key

Fill-in-the-Blank Passages

1. core; fusion
2. hydrogen; helium; energy
3. photosphere; Earth
4. light; heat
5. photosynthesis

Challenge Question

Answers will vary. Example: *Solar energy is renewable for Earth because the Sun provides a constant supply of light and heat every day. Even though the Sun will eventually burn out billions of years from now, it produces more than enough energy to power life on Earth for a very long time.*
