## A Day Without the Sun Answer Key

### Creative Writing Prompt

(Answers will vary.)

Sample: *When I looked outside, the world was covered in darkness even though it was morning. Streetlights stayed on, and people were scared, not knowing what was happening. The air grew colder, and animals searched for warmth. Without the Sun, plants began to droop, and everything felt quiet and strange. I felt nervous, realizing how much we depend on the Sun every single day.*

### Reflection Question

Sample Response: *Earth cannot survive long-term without the Sun because the Sun provides light and heat. Without it, temperatures would drop, plants could not perform photosynthesis, and food chains would collapse.*
