

Name _____

Ocean Tides Vocabulary Matching Answer Key

Matching Activity

1 → C (High Tide = ocean level rises to its maximum height)

2 → D (Low Tide = ocean level falls to its lowest point)

3 → B (Spring Tide = greatest difference between high and low tides, when Sun, Earth, and Moon line up)

4 → A (Neap Tide = least difference between high and low tides, when Sun, Earth, and Moon form a right angle)

Think & Write (Sample)

- Example: *High tide affects fishermen because it can change when they can safely bring boats in and out of harbor. It also influences when beach areas are covered with water, which matters for visitors and local businesses.*
