Name _____

Planetarium Puzzles

Directions: Read the passage. In each set of three statements, **underline the one lie**. Then **write the exact sentence from the passage that proves it is the lie**.

On Thursday, Ms. Carter takes her class to the city science museum. The students file into the dark **planetarium** and sit in soft, round seats. A guide projects bright stars across the curved ceiling and points out the **spiral shape of the Milky Way**. During the show, the ceiling changes colors as comets streak past the screen. Afterward, the class visits the gift shop, where several students buy glow in the dark star stickers.

Set One

1. The class visits the science museum with **Ms. Carter**.
2. The students sit in hard metal chairs during the show.
3. Bright stars are projected on the ceiling.

Proof:

Set Two

1. The guide points out the **spiral shape of the Milky Way**.
2. The ceiling changes colors as comets streak past.
3. The guide teaches the class how to build a rocket.

Proof:

Set Three

1. The students go to the gift shop **after the show**.
2. Several students buy glow in the dark **star stickers**.
3. Every student buys a telescope at the museum.
