Name _____

Desert Data Answer Key

1. True
2. True
3. False
4. True
5. False
6. True
7. False
8. True

Teacher's Guide

- Remind students that answers must be based **only on the passage**, not on outside science knowledge.
- For support, have students underline the **exact sentence** that proves each true or false decision.
- For engagement, pause after reading and predict which measurements will change the fastest.
- For extension, ask students to rewrite one false statement so that it becomes accurate using text details.
- For enrichment, challenge students to explain **why** the class drew its final conclusion from the data.
