

Name \_\_\_\_\_

## Tiny Treasures Answer Key

- Treasures are successfully moved and placed inside treasure chest outlines.
- Sorting by color or quantity (if applicable).
- Demonstrates control, coordination, and accurate tweezer use.

### Teacher's Guide

- Demonstrate proper technique: "Pinch, lift, and place gently."
- Encourage students to narrate what they're doing ("I'm moving a blue gem to the chest!").
- Use real or pretend pirate voices to make the task fun and thematic.

### Differentiation Ideas

- For beginners: use larger beads and fewer treasures.
- For advanced learners: assign color-coded sorting (e.g., red gems in Chest 1, blue in Chest 2).
- Add a counting challenge ("Put five treasures in each chest").

### Engagement Boosters

- Play soft ocean or pirate-themed music during the activity.
- Give each child a pirate name ("Captain Sparkle," "Treasure Tia").
- Create a simple story: "The pirates lost their treasure—help them fill the chests before the tide comes in!"

### Extension Activities

- Glue the treasures into the chests to make a sparkling art display.
- Use number cards beside the chests for counting practice.
- Have students draw their own treasure maps after completing the activity.
